

Colliers Mills Wildlife Management Area is a 12906.63 acre wildlife management area located within Jackson and Plumsted townships, Ocean County, New Jersey. Success Lake is located within the management area. The area is part of the New Jersey Pinelands National Reserve. Amelia Wildlife Management Area is a 2217 acre Wildlife Management Area located in Amelia County, Virginia. Primarily upland habitat, it also preserves around 175 acre of bottomland hardwoods and beaver swampland along the Appomattox River. Much of the land was formerly used for farming; today it is managed to preserve wildlife habitat. The forest is mature, with gently rolling terrain, and an altitude between 200 and above sea level. Much of the area is bounded on the north by the Appomattox River. Bluestone Wildlife Management Area (also known as Bluestone Lake Wildlife Management Area) is a wildlife management area in southern West Virginia surrounding Bluestone Lake and the New River. The section of the lake from just upstream of the Bluestone River to Bluestone Dam is in Bluestone State Park; the rest of the lake in West Virginia basin comprises Bluestone WMA. Altogether, the WMA comprises 18019 acre of land and water. Chester F. Phelps Wildlife Management Area (also known as the C.F. Phelps Wildlife Management Area) is a 4539 acre Wildlife Management Area located in Fauquier and Culpeper counties, Virginia. It contains over 1000 acre of open land previously used for agriculture; additional open areas may be found within the forests on the property. Most of the terrain is rolling, low, and shallow; the steepest land can be seen near the Rappahannock River, which forms a large part of the property's western border. A number of small streams cross the land, and a 3 acre pond is located near its center. The forests on the property contain both pine and hardwood. Fairmount Wildlife Management Area is a Wildlife Management Area in Somerset County, Maryland. The wildlife management area comprises more than 4,000 acres of mostly marshland. It is located on the Eastern Shore of Maryland along the Chesapeake Bay between the Manokin and Annemessex Rivers in Somerset County. Black ducks, pintails, gadwall, wigeon, blue- and green-winged teal, and many other species of waterfowl can be found in the area. Dewey W. Wills Wildlife Management Area, also just called Dewey Wills Wildlife Management Area and formally known as the Saline Wildlife Management area, is a 63,901 acre tract of protected area located in LaSalle Parish, Catahoula Parish, and Rapides parish, in Central Louisiana. The Louisiana Department of Wildlife and Fisheries (LDWF) owns 63,901 acres, the LaSalle Parish School Board owns 1530 acres, and the U.S. Army Corps of Engineers (USCOE) owns 265 acres, managed by the LDWF. Dick Cross Wildlife Management Area is a 1400 acre Wildlife Management Area in Mecklenburg County, Virginia. Formerly known as the Elm Hill Wildlife Management Area, it sits on the north side of the Roanoke River just below the John H. Kerr Dam. The terrain is gently rolling and fairly low, between 200 and above sea level, and is typified by open fields maintained for the benefit of wildlife. Much of the land was once used to support the farming of cattle, and some evidence of this remains. Close to 300 acre of broad flood plain has been preserved along the river and along Allen Creek, which forms the area's eastern boundary before joining the Roanoke River. Around 165 acre of the area includes impounded wetlands specifically managed for waterfowl. The Hartland Swamp Wildlife Management Area is a 401 acre wildlife management area (WMA) located in western New York, USA. Hartland Swamp WMA is located northeast of Lockport in the Town of Hartland in northeastern Niagara County. It is managed by the New York State Department of Environmental Conservation. Lockport is a city in Niagara County, New York, United States. The population was 21,165 at the 2010 census. It is so named from a set of Erie Canal locks within the city. Lockport is the county seat of Niagara County and is surrounded by the town of Lockport. It is part of the Buffalo–Niagara Falls Metropolitan Statistical Area. Heater's Island Wildlife Management Area is a former Wildlife Management Area in Frederick County, Maryland. It has been subsumed into the larger Islands of the Potomac Wildlife Management Area. Hartland Swamp WMA is located northeast of Lockport in the Town of Hartland in northeastern Niagara County. Lockport is a city in Niagara County, New York, United States.
